

Loss data available on-line 24 hours a day

The Aviation Major Loss Database is designed to assist underwriters, reinsurance buyers and claims personnel by providing a stream of major aviation loss information and data, available on-line 24 hours a day.

The database contains information on aviation losses that are near to or over USD10million.

Summary loss reports and loss financials are available to view and download.

Innovative map-based navigation with loss coordinates plotted with clusters highlighted.

Highlights important news and links to the loss details by clicking 'read more'.

Loss summary of key metrics for historic losses.

Scroll and zoom in on the loss coordinates and click on the marker to see the loss details. Change the map type using the pull-out menu.

Headline Ticker Tape feature with latest loss notification or news on any significant updates.

Navigate through the pages or use the search filter to narrow the selection.

Improved search functionality to filter the loss data.

Standard filter options or advanced filter options to display only losses meeting your criteria.

Loss event summary including key categories for further analysis and Detail by insured expanding the data by insured and cover type.

Available to download to Microsoft Excel, the data and the format are ideal for further analysis or use in models or model criteria.

Download Loss triangulations and Event Details to Microsoft Excel for further analysis of your own.

From initial reserve to fully paid, view amounts by loss event by year for Hull, Liability and Products. View paid or incurred amounts in US dollars or by percentage of current paid or incurred. Additionally, view summaries by year.

The Major Loss Database is a member of Willis Re's eXPRESS™ Online. eXPRESS™ Online is a growing platform, continuously fed with more tools and functionality. Ask your account executive for further details.
